

Edge Defender: Sector Wars

Interactive Conference Game Powered by IGEL

Executive Summary

Edge Defender: Sector Wars is a browser-based conference game designed to educate attendees on IGEL's value proposition through an engaging cybersecurity challenge.

Attendees scan a QR code, select an industry scenario, and defend critical edge systems against waves of cyber threats using IGEL technologies and capabilities.

The game is designed to:

- Increase booth engagement
 - Generate qualified leads
 - Reinforce IGEL messaging
 - Encourage repeat participation
 - Create memorable conference experiences
 - Support leaderboard-driven competition
-

Game Overview

Core Concept

The player is responsible for protecting critical edge infrastructure from increasingly sophisticated cyber attacks.

Threats attack from all directions while the player deploys IGEL capabilities to maintain security, availability, and operational continuity.

Game Duration

- 60–90 seconds per round
- Fast enough for conference traffic
- Long enough to create engagement

Target Audience

- IT Administrators
- Security Teams
- Endpoint Engineers

- Architects
 - CISOs
 - CIOs
 - Public Sector Leaders
-

Attendee Experience

Step 1: Scan QR Code

Attendee scans a booth QR code.

Game launches instantly in the mobile browser.

No app installation required.

Step 2: Lead Capture

Collect:

- First Name
- Last Name
- Company
- Email Address
- Opt-in Consent

Optional:

- Job Role
 - Industry
-

Step 3: Choose Mission

Available Missions

Save the Hospital

Protect the Bank

Secure the Agency

Defend the Base

Step 4: Defend the Edge

The player uses IGEL capabilities to stop attacks and protect mission-critical systems.

Step 5: View Results

Results screen displays:

- Final Score
- Endpoints Saved
- Threats Stopped
- Best IGEL Capability Used
- Leaderboard Ranking

Call-to-action:

- Book a Demo
 - Learn More
 - Enter Prize Drawing
-

Industry Scenarios

Healthcare: Save the Hospital

Assets to Protect

- Electronic Medical Records
- Nurse Stations
- Radiology Systems
- Patient Monitoring Devices

Threats

- Ransomware
- Phishing Campaigns
- Credential Theft
- Medical Device Exploits

Boss Battle

The Ransomware Surgeon

Attempts to encrypt the entire hospital network.

Success Message

"Patient care remains uninterrupted. Critical healthcare systems are protected."

Finance: Protect the Bank

Assets to Protect

- Trading Systems
- Teller Workstations
- Loan Processing Platforms
- ATM Infrastructure

Threats

- Banking Trojans
- Fraud Bots
- Credential Theft
- Insider Threats

Boss Battle

The Market Manipulator

Launches coordinated attacks against financial systems.

Success Message

"Financial operations remain secure and customer trust is preserved."

Government: Secure the Agency

Assets to Protect

- Citizen Services

- Public Records
- Tax Systems
- Agency Workstations

Threats

- Nation-State Actors
- Supply Chain Attacks
- Data Exfiltration
- Privilege Escalation

Boss Battle

Advanced Persistent Threat (APT)

Continuously evolves attack methods.

Success Message

"Government services remain secure and available."

Military: Defend the Base

Assets to Protect

- Command Center
- Intelligence Systems
- Secure Communications
- Field Operations

Threats

- Electronic Warfare
- Reconnaissance Drones
- Advanced Malware
- Insider Compromise

Boss Battle

The Red Team General

Launches synchronized attacks from every direction.

Special Gameplay Mechanic

Certain threats remain hidden until detected.

Success Message

"Mission accomplished. Operational readiness maintained."

Legal: Protect the Law Firm

Assets to Protect

- Client Data
- Case Files
- Discovery Systems
- Partner Workstations

Threats

- Data Theft
- Ransomware
- Insider Threats
- Credential Harvesting

Boss Battle

The Litigation Leaker

Attempts to steal confidential legal documents.

Success Message

"Attorney-client privilege remains protected."

IGEL Defensive Capabilities

Players use IGEL technologies as defensive powers.

Immutable Fortress

Creates a temporary shield around all endpoints.

Effect

Blocks malware persistence and unauthorized system changes.

UMS Command Center

Instantly deploys security policies across multiple endpoints.

Effect

Hardens devices and removes vulnerabilities.

App Portal Deployment

Deploys approved applications and updates.

Effect

Restores productivity and closes application-related risks.

Adaptive Secure Desktop

Dynamically adjusts user access.

Effect

Protects against credential theft and unauthorized access.

Disaster Recovery Rollback

Instantly restores compromised endpoints.

Effect

Recovers systems after successful attacks.

Threat Types

Malware Bot

Basic malware attack.

Credential Thief

Attempts account takeover.

Rogue USB Goblin

Introduces unauthorized devices.

Shadow IT Phantom

Deploys unmanaged applications.

Patch Lag Monster

Exploits outdated software.

Data Exfiltration Drone

Attempts to steal sensitive information.

Scoring System

Points Earned

Threat Eliminated

+100 Points

Asset Saved

+250 Points

Boss Defeated

+1000 Points

Perfect Defense Bonus

+2000 Points

Bonus Achievements

Immutable Streak

Block five attacks without damage.

UMS Commander

Protect ten endpoints simultaneously.

Zero Trust Save

Stop an attack at the last second.

Edge Guardian

Complete a mission with no losses.

Leaderboards

Event Leaderboard

Top scores for the entire conference.

Industry Leaderboards

Healthcare Defenders

Top hospital protection scores.

Finance Defenders

Top banking protection scores.

Government Defenders

Top agency protection scores.

Military Defenders

Top defense mission scores.

Legal Defenders

Top law firm protection scores.

Company Leaderboard

Aggregate scores by company.

Example:

1. Acme Health
 2. Global Bank Corp
 3. Federal Services Group
-

Daily Prize Leaderboard

Resets each day of the conference.

Encourages repeat participation.

Achievement Badges

 Edge Guardian

 Immutable Legend

 UMS Master

 Zero Trust Hero

 Ransomware Slayer

 Threat Hunter

 Sector Champion

Grand Finale

Global Edge Crisis

Unlocked after completing sector missions.

All industries are attacked simultaneously:

- Hospital under ransomware attack
- Bank under fraud attack
- Government under APT attack
- Military under coordinated assault
- Law firm under data theft

Player must deploy IGEL capabilities across multiple environments.

Core Message

One Platform.

One Operating System.

Thousands of Endpoints.

Every Industry.

Anywhere.

Technical Architecture

Frontend

- React
- Next.js
- Phaser.js

Backend

- Supabase or
- Firebase

Authentication

- Optional anonymous play
- Lead capture integration

CRM Integration

- Salesforce
- HubSpot
- Marketo

Hosting

- Vercel
 - Netlify
-

Conference Display Mode

Large-screen monitor displays:

- Live leaderboard
- Current top players
- Active tournament standings
- High-score celebrations

Creates visibility and attracts booth traffic.

Success Metrics

Engagement

- QR Scans
- Games Started
- Games Completed

Marketing

- Leads Captured
- Demo Requests
- Prize Registrations

Product Education

- Industry Selection Trends
 - Feature Usage Statistics
 - Threats Defeated by Capability
-

Future Enhancements

Multiplayer Mode

Defender vs Defender

Defender vs Attacker

Augmented Reality Mode

Visualize attacks in real-world environments.

Executive Strategy Mode

Non-action version designed for CIOs and business leaders.

Key Message

Edge Defender: Sector Wars demonstrates how IGEL helps organizations protect critical endpoints, reduce attack surfaces, simplify management, and maintain operational continuity across healthcare, finance, government, military, and legal environments.
